

TGS TRID Gemporary System

SEBASTIAN DAWBER
BSC ARCHITECTURE &
ENVIRONMENTAL DESIGN

BRIEF 1: DESIGN IN CITIES
BRIEF 2: ENVIRONMENTAL DESIGN
AND TECHNOLOGY

THE IDEA FOR MY DESIGN IS BASED ON MY SPACE BEING TEMPORARY AND EASY TO PUT TOGETHER. THERE IS A GRID SYSTEM DESIGNED SPECIFICALLY FOR THESE SPACE WHICH OFFERS SUPPORT FOR THE PILLARS THAT FORM THE SUPPORTING STRUCTURE. EACH PILLAR IS PLACED IN THE VARIOUS HOLES MAKING THE STRUCTURE OF THE DESIGN, THEN AFTER THE WALLS AND RAIL SYSTEM ARE ADDED ON TOP

THE DESIGN RESPONDS TO THE CHANGING ENVIRONMENT WITH A NUMBER OF DIFFERENT SYSTEMS WITHIN THAT ADAPT TO THE NEEDS OF THE DAY AND CHANGING CLIMATE CONDITIONS
