

Back to basics

G- grow, P- process ,M- make ,B- Build, S- Sell

- Harvests occur every 2 months

- 1 hectare (10,000.sqm) produces enough hemp for a 120 sqm house

My design has 5 596 sqm of growing space which produces enough hemp for a 120 sqm house every 4 months, thus Back to basics produces enough hemp for 3 houses at 32sqm every 4 months with 4 houses being produced every year those that work on site are able to grow and build their own house on site to create a circular community overtime
